

# Matchstick puzzle 11

## 4, 5, Squares

You need 24 matchsticks for this puzzle.

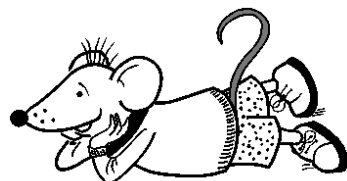

Can you make four squares out of these 24 matchsticks?

A clue: the squares may not all be the same size!!

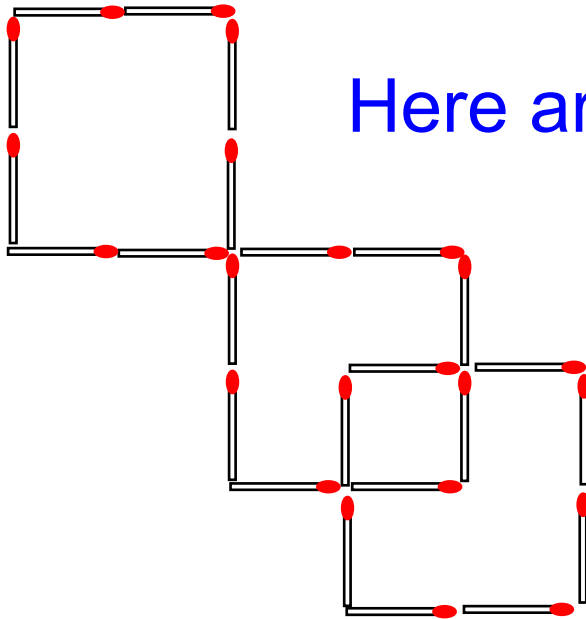

And to be really brilliant can you make 5 squares?

Is that possible? It must be I suppose!

# Matchstick puzzle 11 - answer

4, 5, squares

Here are 4 squares

And now 5 squares
